

Kiel Johnson's 'Studies on an Airship Ride' @ Pulse LA

October 1st, 2011 - by Jack in Art Fairs

Kiel Johnson creates spectacular sculpture from everyday materials including cardboard and chipboard for a look that resembles reality while still retaining a pleasing hand-built quality. His large-scale '**Studies on an Airship Ride**' is on display @ **Pulse LA** for the **Pulse Projects** program courtesy of Mark Moore Gallery and Davidson contemporary. The installation piece provides an airborne view of a cityscape chock full of buildings – houses, skyscrapers, and even an athletic stadium. We spent quite awhile peering at this one from multiple angles – enjoy the photos.
